

PROJECT MANAGER

ABOUT SYNSIGHT

SYNSIGHT is a company specialized in the discovery and development of therapeutic small molecules, specifically targeting protein-RNA and protein-protein interactions.

Thanks to its discovery platform at the convergence of artificial intelligence and cellular imaging, SYNSIGHT develops a portfolio of proprietary and partnered therapeutic projects. The multi-scale vision of the experimental biology platform, at the core of the human cell, makes it possible to confirm the mode of action of molecules, to discover the potential effects on side biological targets, to secure the later phases of drug development. Artificial intelligence and chemoinformatics improve the processes involved in the discovery and design of drug candidates and are mainly applied in two areas: generation of new organic molecules using generative models, and images analysis from high-content cell-based images produced in its wet laboratory.

ROLE

We are looking for the principal project manager of our company.

Your role will be to manage the portfolio of SYNSIGHT's projects and a small team, which can be focused on the development of technological platform (drug discovery tools, chemoinformatics tools, cell based assays). Knowledge in drug discovery science is mandatory, and ability to quickly understand different scientific areas is important.

YOUR PROFILE

- Scientific background (PhD);
- Experience in pharmaceutical industry;
- Passion for innovation and proactive mindset;
- Comprehensive knowledge and understanding of drug discovery pipelines;
- Fluency in English;

This job offer is intentionally short because for this position, we will care much about the personality and experience of the candidate.
